INTRODUCTION

The mandate of the Immigration Statistics Division, Immigration Group, is for the most part the dissemination of immigration data. Our annual publication is one of the main sources of general data used by both government and the private sector. For this reason we try to provide information on admissions to Canada that is of the greatest interest to all parties.

The publication is divided into three major sections. The first section contains general interest statistics on population, Landed Immigrants and travel between Canada and other countries. The main source of this information is Statistics Canada.

The second and largest section deals with Landed Immigrants. The origin of Landed Immigrants is classified in this publication according to three (3) different criteria: Country of Birth, Country of Citizenship, and Country of Last Permanent Residence. Because of the different nature of the criteria, arrivals under the various classifications will not be the same. A person may be born in a country but not necessarily hold the citizenship of that country; e.g. a person may be born in Finland but retain the citizenship of the father or the person may have adopted another citizenship by naturalization. Again, Country of Last Permanent Residence, which is the country in which a person has resided before coming to Canada need not be identical to the Country of Birth or Country of Citizenship. The two main characteristics of this section are Country of Last Permanent Residence (CLPR) and occupation. The occupations used are defined according to the Canadian Classification and Dictionary of Occupations (C.C.D.O.).

The last section describes the movement of people coming to Canada on a temporary basis, that is admissions of foreign students and temporary foreign workers and documented visitors.

In this way we hope to provide both producers and users of immigration statistics with a clear and concise source of data. The following definitions/interpretations are included as an aid to understanding the statistics.

La Division des statistiques sur l'immigration, du Groupe de l'immigration, a principalement pour mission de diffuser des données sur l'immigration. Notre publication annuelle est l'une des sources de référence les plus importantes à laquelle peuvent puiser les gouvernements et le secteur privé. Voilà pourquoi nous nous employons à donner des renseignements sur les admissions au Canada qui peuvent être d'une grande utilité pour chacun d'eux.

Le présent ouvrage est réparti en trois sections principales. La première renferme des données d'intérêt général sur la population, les immigrants admis et les déplacements entre le Canada et d'autres pays. Ces renseignements sont tirés pour la plupart de Statistique Canada.

La deuxième et la plus grande section traite des immigrants ayant obtenu le droit d'établissement. Leur origine est classée, dans le présent ouvrage, selon trois critères différents : le pays de naissance, le pays de citoyenneté et le pays de dernière résidence permanente. À cause de la diversité des critères, les arrivées suivant les différentes catégories ne sont pas les mêmes. Une personne peut être née dans un pays donné mais peut ne pas nécessairement être citoyenne de ce pays; p. ex., une personne peut être née en Finlande mais avoir conservé la citoyenneté de son père, ou elle peut avoir adopté une autre nationalité par voie de naturalisation. Par ailleurs, le pays de dernière résidence permanente, qui est celui où cette personne avait établi sa résidence avant de venir au Canada n'est pas nécessairement le même que son pays de naissance ou de citoyenneté. Les deux éléments principaux de cette section sont le pays de dernière résidence permanente (PDRP) et le secteur d'activité. Les professions utilisées sont définies selon la Classification canadienne descriptive des professions (CCDP).

La dernière section traite du mouvement des personnes qui viennent au Canada à titre temporaire, c'est-à-dire qu'elle décrit les admissions en vertu de visas de visiteurs, de permis de séjour pour étudiants et de permis de travail.

Nous comptons, de cette manière, aider à la fois ceux qui produisent des statistiques et ceux qui les utilisent, en leur fournissant une source claire et concise de données. Les définitions ou interprétations suivantes ont pour but de faciliter la compréhension des statistiques.
